

## Boca Raton Pilots Association meeting

We spend lots of time in IFR training and currency on instrument approaches that safely guide us to an airport. However, how do we safely depart an airport? An IFR clearance is not a guarantee that you can safely depart an airport. Even airports in flat Florida have obstacles that can effect an IFR departure. In this seminar we will discuss the steps in determining how to safely depart an airport and get to a safe altitude. We will also discuss how to use departure data and procedures like textual and graphical ODPs, Diverse Vector Areas (DVA), and SIDs.

**Directions:** Follow I-95 taking exit number 44. Take Palmetto Park Road going east. Turn Left onto Crawford Blvd. Boca Raton Community Center will be on the right.
